

# EARTHSAFE

FUEL SYSTEMS FOR CRITICAL POWER

## E3

### CRITICAL SYSTEM ENCLOSURES

#### Welded aluminum or Stainless Steel Construction

E3 Critical System Enclosures are designed to protect mechanical and electrical systems. The construction is weatherproof non-corrosive aluminum, or optional stainless steel with tubular welded frame. The base is liquid tight for enclosing fluid pumps and process systems. Units are dimensioned for walk-in.

Applications include:

- Tank Enclosures: Engine Fluids: Diesel, DEF, Oil
- Engine, Pump, and Generator Enclosures
- Water and Water Recycling Systems
- Rail and Transportation Systems
- Power and Telecom Utility Systems
- Environmental Monitoring

<b>Specification</b>	Welded Aluminum Stainless Steel Option
<b>Design</b>	NEMA 3R, 4, 4X
<b>Standard</b>	Paddle Latch Lifting Lugs Top Bolt-Down Bracket Liquid Tight Base Continuous Hinge
<b>Optional Accessories</b>	Stainless Steel Construction Lockable Latch  Interior Insulation Heater and Thermostat Dual Vents with Filters Vent and Fan with Filters Air Conditioning  Exterior Coating Specified Interior Coating Specified Internal Channel Support  Interior Lighting Interior Power Outlet Door Tamper Switch Leak Sensor
