

ESM10.T4

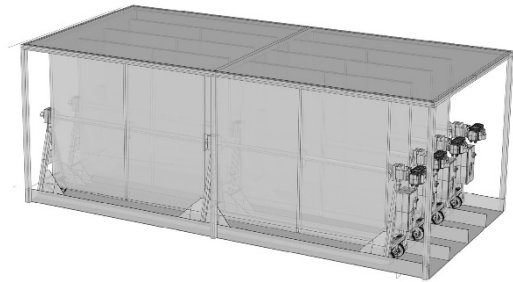

ESM10.T4: Solar Array Pack

Earthsafe ESM20.T4 is a shipping package for 4 mobile solar arrays of 4 panels each. The 16 panels are capable of generating 6000 watts of power.

The solar panel arrays include wheels for easy roll-on roll-off from the package. The pack can be loaded onto trucks or trailers for delivery to site.

Each array has its panels folded for efficient packing and transport. Each is easily rotated to position with plug and play connectivity to the solar power management module.

The system is designed for special event support, remote facilities, exploration base camps, or humanitarian response.

Dimensions	96" W x 90" H x 192" L (2400W x 2250H x 4800D)
-------------------	---

Capacity	6000 Watt
-----------------	-----------

Weight (Estimate)	1500 LB (750 KG) Empty 4000 LB (2000 KG) Loaded
--------------------------	--

Construction	Welded Aluminum Forklift Pockets Lifting Lugs
---------------------	---

How to Order	ESM10.T4 Solar Array Pack
---------------------	---------------------------
